## 2. Relinquished commitments

The tables below list those commitments that are not going to be met in the manner in which they were formulated and which, therefore, should be relinquished.

### Commitments relinquished during the first six months of 2021

Source	Commitment	Reason
Agreement with Bloque Nacionalista Galego G 7	Recover the activity of Barreras and Vulcano (shipbuilding industry)	<p>This commitment could have been met, but it has been relinquished for the following reasons:</p> <p>Vulcano, by decision of the courts, went into liquidation and the Port Authority ultimately decided to declare the concession annulled. The new buyer, which bid successfully for the facilities from the insolvency administration, has applied for the new concession from the Port Authority. The Port Authority must publish a tender for the facilities and it is possible that they will be allocated for a different activity.</p> <p>As regards Barreras, an agreement was finally reached with its creditors whereby the ship-owner took control of the shipyard to complete the vessel on the order book. The vessel was delivered ahead of schedule and removed from the shipyard by the ship-owner. The terms of this part of the agreement were met. However, following delivery of the vessel, the shipyard has been left without any further work, and this is a matter to be addressed by the company.</p>

Source	Commitment	Reason
Progressive coalition agreement 4.1	Approve the Digital Citizenry Strategy, which will include a subsidized rate ( <i>bono social</i> ) for internet access	Achievement of this commitment will be coordinated through the approval of the subsidized rate ( <i>bono social</i> ) for internet access, which has been included in the RTRP, and the approval of the Digital Rights Charter
Address by the Minister of Finance on 20 February 2020	Present a new methodology for the calculation of the expenditure rule, as requested by the Autonomous Communities and City Councils. 2020 objective.	The suspension of the fiscal rules during 2020 and 2021 has rendered this commitment unnecessary

### Commitments relinquished in 2020

Source	Commitment	Reason
Progressive coalition agreement 1.13	Improve the position of rural women in the Social Security system, enabling their effective incorporation.	This would be inconsistent with the general trend of including all workers in the General Social Security Scheme so that they may contribute in accordance with their income.
Agreement with Bloque Nacionalista Galego 12(5)	Study possible tariff compensation for Autonomous Communities with electricity surpluses.	This is not in line with the Electricity Sector Act, which sets forth as one of its fundamental principles that there shall be a single electricity tariff for the entire Spanish territory, including non-mainland territories where energy production costs far exceed the prices paid by consumers.
Agreement with Compromís 5.1	Create a working group independent from the Delegated Committee on Economic Affairs, for joint monitoring.	The aforementioned working group is not going to be created because the interministerial coordination mechanisms needed to undertake this task already exist, e.g. the Ministry of Industry, Trade and Tourism's International Trade Negotiations Committee, in which the different sectors, as well as other relevant ministries, are represented.

Source	Commitment	Reason
Progressive coalition agreement 1.13	Improve the position of rural women in the Social Security system, enabling their effective incorporation.	This would be inconsistent with the general trend of including all workers in the General Social Security Scheme so that they may contribute in accordance with their income.
Agreement with Nueva Canarias 2	Study an amendment to the expenditure rule in the Canary Islands.	Unnecessary, because the expenditure rule has been suspended for 2020 and 2021.
Agreement with Teruel Existe 5	Require that companies only implement extensions using 4G, and not 3G.	This cannot be required because provision of telecommunications services in Spain has been liberalized, pursuant to the EU-wide harmonized regulatory framework. Thus, they may be provided by any operator under market conditions. Operators implement networks and other technical means for providing their services in accordance with their own technical and commercial strategies.

Source	Commitment	Reason
Progressive coalition agreement 1.13	Improve the position of rural women in the Social Security system, enabling their effective incorporation.	This would be inconsistent with the general trend of including all workers in the General Social Security Scheme so that they may contribute in accordance with their income.
Agreement with Teruel Existe 5	Require that broadband coverage plans specify and assess which technology they are going to use.	This cannot be required because Member States must support broadband roll-outs by applying the EU State aid framework. And, pursuant to the Guidelines for the application of State aid rules in relation to roll-outs of broadband networks, aid may only be granted under the principle of technological neutrality in those geographical areas where there are currently no roll-outs, and there are no roll-out plans for a period of three years.
Address by the Minister of Agriculture, Fisheries and Food on 24 February 2020	Prepare a Basic Act on Agriculture	The purpose of this Act is already covered in all the legislation to be implemented as part of the Common Agricultural Policy (CAP) Strategic Plan

### 3. Duplicated commitments

The table below reflects the commitments that were included in the December report, but which, following further review, it is considered should be eliminated because they duplicate other commitments.
